

Health Care Reform

Preventative Drug list

At Magellan Rx Management, we are driven to helping our clients most effectively manage changes in the prescription drug environment. As part of the Patient Protection and Affordable Care Act (PPACA), non-grandfathered plans are required to cover select FDA-approved drug products related to preventive health services for Adults, Children and Women without a member having to pay a copayment or co-insurance or meet a deductible. As your pharmacy benefits manager, we will support coverage of specific products at \$0 copay as prescription benefit plans become subject to the law. Magellan Rx Management will also routinely update FDA-approved product lists to comply with the Preventive Health mandates, and require prescriptions for product coverage.

To meet the needs and provide flexibility to our clients, we have created eight specific lists that address the preventive health requirements above. A plan decision is required for coverage under the pharmacy benefit for each of the lists noted below. The content of the list will be maintained by Magellan Rx Management and will be continually reviewed and updated to ensure compliance with healthcare reform mandates.

UPDATE: For plan years beginning on or after September 24, 2014 (January 1, 2015 for calendar year plans), non-grandfathered health plans are required to cover prescription medications designed to reduce the risk of breast cancer in women, without cost-sharing, subject to reasonable medical management. These required drugs have been added to the “Preventive Health for Adults, Children and Women: Prescription and OTC Products” list below.

1. Preventive Health for Adults, Children and Women: Prescription and OTC Products.

Age edits may apply.
